

GELTY

LEARNING THROUGH TRAVEL

We provide the best educational experiences, which are complemented by exploring and getting to know the wonders of the Costa Rican territory.

Nursing

This study abroad program in Costa Rica provides an immersive cultural experience with a focus community health, comparing and understanding the differences between the public and private health sector in Costa Rica, mental health services, personalized nursing clinic experience in home visits activity and health outreach experience in a indigenous community

Area for expansion with Education Students would be focused on the schools in the community and workshops according to your needs (like community work) all of that together with environmental activities that improve their knowledge.

¿What we offer?

In this program we offer you the experience of getting to know the Costa Rican Health System complemented with a personalized nursing clinic experience in home visits activity or an integrative communitarian experience, as well as workshops and talks on healthcare, education, interaction with Nurse Students, and an approach to the Nurse Major in Costa Rica.

Additionally, we'll give you the opportunity to enjoy some of the best touristic attractions our country has to offer!
